

Eyes

Activity

True or False? Mark each sentence with a T for true or an F for false.

- ___ 1. The sclera is transparent.
- ___ 2. Your pupil can change size.
- ___ 3. Rods help you see in dim light.
- ___ 4. Cones help you see shades of gray.
- ___ 5. Your cornea lets light into your eye.
- ___ 6. Nearsighted people cannot see things close-up.
- ___ 7. Farsighted people have eyeballs that are too short.
- ___ 8. Your optic nerve sends images right-side-up.
- ___ 9. Your eye socket protects your eye from bright light.
- ___ 10. Your brain gets electrical signals from your optic nerve.

Extending Activities

Technology/Language Arts: Do research on the Internet to find out how guide dogs are trained. Write a paragraph about your findings.

Math: Do research to find out the sizes of a human eye, an ostrich eye, and a giant squid's eye. Then, draw a picture of each to show how the different eyes compare to one another.

Science: Do research to find out more about nocturnal animals and how they see.
