

Quick Clips About Eyes

- Our eyes stay the same size from birth.
- On average, humans blink their eyes 6,205,000 times a year.
- If you added up the length of all the eyelashes an average person sheds in one lifetime, it would be over 98 feet long.
- You cannot sneeze with your eyes open.
- Dogs cannot see in color. They see in black and white.
- Butterflies can see colors that we cannot.
- Hawks have the sharpest vision of all animals.
- The little red triangle on the inner corner of the eye is called the caruncle.
- Fish do not have eyelids or tears.
